Perkins Loan Account Setup Procedure

Complete the steps below to set up your online Perkins loan account, where you can access your information, obtain forms, and make payments.

2. Under “Login”, select “First time users: Click here to register.”

3. Under “Registration Method” select the radio button next to “Social Security Number.” Enter your social security number and last name and click “Submit.”

4. Verify the name and address listed. If the address that appears is not your current address but is an old address, check the box next to “I certify...” and click “Yes.” Only click “No” if the address listed is one at which you have never lived. The address was inputted in the system when you first took the loan and may be old.

5. Create a username and password. Pay close attention to the password requirements. The password you set cannot begin or end in a number.

6. After setting up your account, log in to the site.

7. On the left side of the screen, click “Update my profile.”

8. Review the information in that section and update as necessary. Do not enter any information associated with Juilliard, including student mailbox number and e-mail address.

9. After updating your contact information, click “View my accounts.”

10. Review the loan balance and due date. Make a note of the due date and make a payment if necessary. Set up AutoDraft to make paying more convenient.
